

Intertek has always been a pioneer, anticipating the needs of its clients with bold innovations ahead of its competitors.

True to the spirit of our founders, we're leading the industry with our Total Quality Assurance (TQA) value proposition — going beyond physical quality control through our Testing, Inspection and Certification services — to offering Assurance services, ensuring our customers' operating procedures and systems are functioning properly.

INTERTEK IS UNIQUELY POSITIONED TO DELIVER ATIC SOLUTIONS

44 000+ EMPLOYEES

GLOBAL MARKET LEADER IN ASSURANCE

12 000+ AUDITORS, INSPECTORS, TECHNICAL PERSONNEL

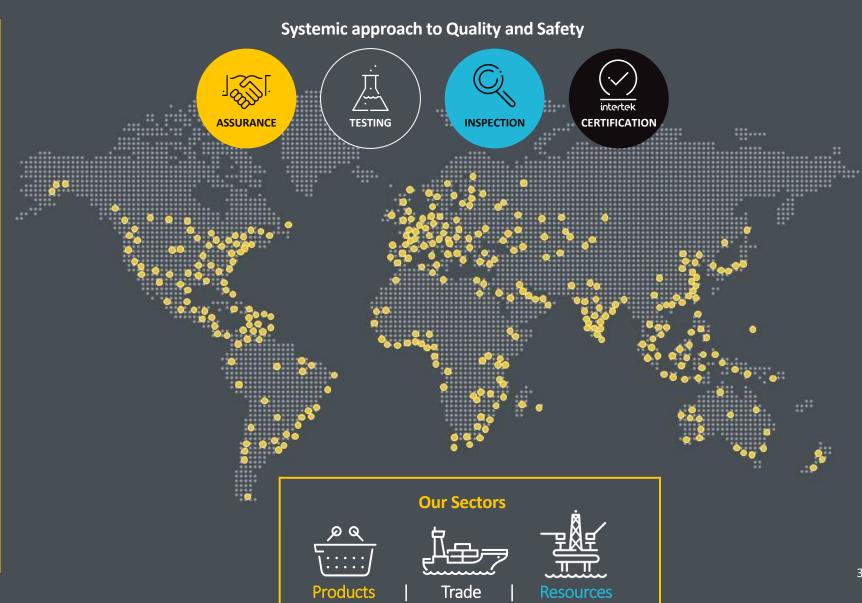

340 000+ INSPECTIONS AND OTHER TECHNICAL VISITS / YEAR

100+ COUNTRIES

GLOBAL MARKET LEADER IN TIC

1 000+ LABS & OFFICES

80+ LANGUAGES

WHY THIS TRAINING?

One the key elements for success of R&D projects is that regulatory requirements as well as third party certification requirements by customer have been taken into account from the very first beginning

This requires basic understanding

- which kinds of requirements in various targets markets there are and
- will exist in near future as well as
- which kinds of alternatives there are to fulfil these requirements

Insert Footer Here 5

UNDERSTANDING IS BASIS FOR MOTIVATION

Even though R&D team members, product and sales management do not need to know all the details of the requirements, they need basic information on them

- to avoid forgetting influence of the requirements on the R&D process
- to avoid unnecessary delays in R&D projects
- to save costs and time

When they know the overall picture, it is much easier them to motive to consider also regulatory requirements.

When one knows and understands why, there is a floor for change and motivation

Presentation of the speaker

Presentation of Intertek

How does the compliance challenge look like?

Basic elements to be taken into account

 Satellite program (use of test data of Manufacturer)

What to learn from experience?

About standards

About Compliance and Conformity Assessment

Safety EU, NA, other countries

About IECEE CB SCHEME and a connection to CE Marking

Exporting your products

- Certain countries have governmental pre-shipment programs

EMC and radio and environmental condition testing

Requirements for Equipment intended for explosive atmospheres

Batteries

Food and Chemical requirements

Requirements Hazardous Substances

About Software requirements e.g. Cyber-security

Differences in the regional procedures

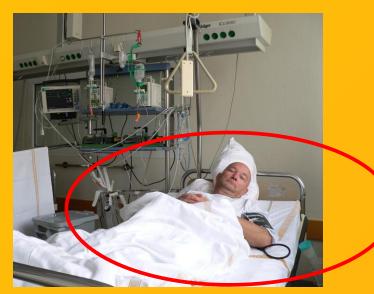

WHY REQUIREMENTS

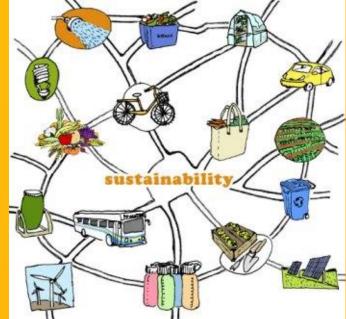

- Safety

People, property and animals

- Quality
- Sustainability
- New Innovations
