Aranet4 – best-in-class wireless air quality monitor
 aranet

Key features:

- Measures CO_2 level, temperature, relative humidity, and atmospheric pressure
- Warns you when air quality deteriorates
- Easy to use, set up, and carry around

Technical advantages:

- Accuracy: nondispersive infrared (NDIR) sensor
- Real time: 1, 2, 5, or 10 min data update intervals
- Reliability: super-efficient e-ink display that extends its battery life to almost 4 years (2xAA)

Unique to Aranet Cloud - Public monitor

aranet

- **Dedicated sensor widget** for Aranet4Pro sensor data live exposure

- **Unique URL** for every sensor to ensure security

- **Customizable** history trend line up to 24h

- **User-defined** warning and critical levels

- Private or public mode to ensure **data privacy**
